Pursuant to Environmental Protection Act, R.S.O. 1990, c.E.19 (EPA), and the regulations made thereunder and subject to the limitations thereof, this System Wide Environmental Compliance Approval (ECA) for Municipal Sewage Works is issued under Section 20.2 of Part II of the EPA to:

Site Location:

The Regional Municipality of Halton

1151 Bronte Road
Oakville, Ontario L6M 3L1

For the following municipal sewage works:

The Sewage Collection System servicing the Burlington-Skyway Wastewater Treatment Plant

This Environmental Compliance Approval includes the following:

### Overview

The sanitary sewage collection system serving the Burlington Skyway Wastewater Treatment Plant (WWTP), approved under ECA No. 1545-9B7PT7 (dated November 22, 2013), consists of approximately 643 kilometers (km) of sanitary sewer mains and twenty three (23) wastewater pumping stations (WWPS). The Collection System serves the urban area of the City of Burlington and a small portion of the Town of Oakville. The projected population of 185,000 reside across a drainage area of approximately 9,000 hectares (ha), with a mix of residential, commercial and institutional and industrial
land uses for the planning horizon (2031).

The Approval covers the Sewage Collection System draining to the Burlington Skyway WWTP and the associated pumping stations serving this Sewage Collection System. The Burlington Skyway WWTP is covered under a separate approval. This Approval does not cover any storm sewers, stormwater management facilities or other stormwater infrastructure covered under other instruments, or waste management sites or leachate collection and pumping systems covered under other instruments.

This Schedule A includes:

1.0 System-Wide Approval – Collection System
2.0 System-Wide Approval – Lift Stations
3.0 System-Wide Approval – Flow Regulators, Storage Tanks, and Overflows
4.0 Revocation and Replacement of Environmental Compliance Approvals

1.0 System Wide Approval – Collection System

The main components of the Sewage Collection System includes the Mains and Forcemains described below:

1.1. Gravity sewer Mains and Forcemains included in Table 1:

</tbody>
</table>
### Description
A concrete wet well/dry well sanitary sewage pumping station.

### Pumps
Thee (3) pumps with a nominal rated capacity of 133 L/s at 14.0m TDH, connected to two (2) 350mm diameter sanitary forcemains, respectively 244 m and 174 m long.

### Standby Power
25 kW diesel pump driver.

### Previous ECA
No approval record or historically unapproved equipment.

### Notes
The drainage area is bounded in general by Hydro ROW to the North, Apple, Cherry Hill and White Pines to the east, Lake Ontario to the south, and Turner, Delaney, Silvann and Tuck to the west. The pumping station provides for the collection and transmission sanitary sewage servicing an area of 94.7 ha, comprised of a mixture of residential, commercial and industrial contributions. A 600 mm diameter outfall to the adjacent creek upstream of Lake Ontario. Also known as WWPS #32.

---

### 2.4 Junction Street WWPS

#### Location
2137 Lakeshore Rd., located on the north side of Lakeshore Rd. at the intersection with Old Lakeshore Road.

#### UTM Coordinates
597965 E, 4797924 N

#### Description
A concrete wet well/dry well sanitary sewage pumping station.

#### Pumps
Two (2) pumps with a nominal rated capacity of 135 L/s at 14.0 m TDH connected to a 570 m long 300 mm diameter sanitary forcemain.

#### Standby Power
A 65 kW diesel generator set.

#### Previous ECA
ECA No. 3-0122-84-006 issued on March 05, 1984.

#### Notes
The drainage area is bounded in general by the Hydro ROW to the north, Guelph St. to the east, Lake Ontario to the south and Brock St. to the west. The pumping station provides for the collection and transmission sanitary sewage servicing an area of 90.6 ha, comprised of a mixture of residential, commercial and industrial contributions. A 375 mm, 300 mm, and 450 mm diameter outfall pipes to Rambo Creek upstream of Lake Ontario. Also known as WWPS #33.

---

### 2.5 Roseland WWPS

#### Location
3241 Lakeshore Rd., located on the north side approximately 100m east of Brookfield Avenue, west of Roseland Creek.

#### UTM Coordinates
599708 E, 4799168 N

---
### Description
A concrete wet well/dry well sanitary sewage pumping station.

### Pumps
Three (3) pumps with a nominal rated capacity of 175 L/s at 44 m TDH connected to two (2) sanitary forcemains: one old (1987) asbestos cement 350 mm about 1950 m long discharging into the Burlington East Trunk at Seneca Ave; and newer (2004) 350 mm HDPE about 1420 m long discharging at Rossmore Ave and New Street.

### Standby Power
255 kW Standby natural gas generator set.

### Previous ECA

## Notes
The drainage area is bounded in general by New St. and Hydro ROW to the north, Longmoore and Walkers Line to the east, Lake Ontario to the south, and Guelph St. to the west. The pumping station provides for the collection and transmission sanitary sewage servicing an area of 259.3 ha, comprised of a mixture of residential, commercial and industrial contributions. A 600 mm diameter outfall to the adjacent Roseland Creek upstream of Lake Ontario. Also known as WWPS #34.

---

### 2.6 Paletta Gardens WWPS

#### Location
4281 Lakeshore Rd., located on the north side approximately 115m east of Shoreacres Road.

#### UTM Coordinates
601026 E, 4800953 N

#### Description
A concrete wet well/dry well sanitary sewage pumping station.

#### Pumps
Three (3) pumps with a nominal rated capacity of 75 L/s at 31.0 m TDH connected to a 2440 m long 450 mm diameter sanitary forcemain discharging into the Burlington East Trunk at Walkers Line.

#### Standby Power
15 kW diesel generator set and 250 kW diesel pump driver.

#### Previous ECA
No approval record or historically unapproved equipment, built in 1964.

#### Notes
The drainage area is bounded in general by the Hydro ROW to the north, Apple, Cherry Hill and White Pines to the east, Lake Ontario to the south, and Longmore and Walkers Line to the west. The pumping station provides for the collection and transmission sanitary sewage servicing an area of 372.7 ha, comprised of a mixture of residential, commercial and industrial contributions. A 600 mm diameter outfall to
### 2.7 Edgewater Crescent WWPS

**Location**
604 Edgewater Crescent, located at end of cul-de-sac.

**UTM Coordinates**
595513 E, 4796038 N

**Description**
A steel dry well type sanitary sewage pumping station.

**Pumps**
One (1) pump with a nominal rated capacity of 4.8 L/s at 11.4 m TDH connected to a 76 m long 75 mm diameter sanitary forcemain.

**Standby Power**
None.

**Previous ECA**
No approval record or historically unapproved equipment, built in 1971.

**Notes**
The drainage area consists of 5 parcels at the end of the crescent. The pumping station provides for the collection and transmission sanitary sewage servicing an area of 1.0 ha, comprised of residential contributions. A 200 mm diameter outfall to the adjacent stream upstream of Lake Ontario. Also known as WWPS #35.

### 2.8 Spring Garden Road WWPS

**Location**
834 Spring Garden Rd., located on the south side approximately 160 m west of Brookview Avenue.

**UTM Coordinates**
590609 E, 4793446 N

**Description**
A concrete wet well.

**Pumps**
Two (2) pumps with a nominal rated capacity of 6.3 L/s at 11.0 m TDH connected to a 253 m long 100 mm diameter sanitary forcemain.

**Standby Power**
None.

**Previous ECA**
ECA No. 3-0068-80-006 issued on February 13, 1980.

**Notes**
The drainage area includes approximately 11 parcels at the west end of Spring Garden Road. The pumping station provides for the collection and transmission sanitary sewage servicing an area of 2.2 ha, comprised of a mixture of residential, commercial and industrial contributions. A 200 mm diameter outfall to the roadside ditch upstream of Lake Ontario. Also known as WWPS #38.

### 2.9 Oaklands Park Court WWPS

**Location**
89 Oaklands Park Ct., located on the north side approximately 260 m west of LaSalle Park Road.

**UTM Coordinates**
593316 E, 4794754 N

**Description**
A fiberglass reinforced plastic wet well sewage pumping station.

4.0 Revocation and Replacement of Previous Environmental Compliance Approvals

4.1 The issuance of this Approval revokes and replaces all approvals or portions thereof issued by the Ministry for the sanitary sewers included under Table 1 of section 1.1.1 of this Schedule A.

4.2 The issuance of this Approval revokes and replaces approvals or portions thereof issued by the Ministry for the lift stations included under section 2 of this Schedule A, which include.

(a) Approval # 6043-8W9Q6U issued on August 21, 2012.
(b) Approval # 4437-779JV5 issued on September 21, 2007.

(c) Approval # 5879-65GPSB issued on October 12, 2004.

(d) Approval # 9474-5HYT2J issued on January 28, 2003.

(e) Approval # 2168-4QNMG3 issued on November 9, 2000.

(g) Approval # 3-0122-84-006 issued on March 2, 1984.

(h) Approval # 3-0283-82-006 issued on May 21, 1982.

(i) Approval # 3-0207-81-006 issued on June 16, 1981.

(j) Approval # 3-0207-81-006 issued on June 16, 1981.

(k) Approval # 3-0068-80-006 issued on February 13, 1980.

(m) Approval # 3-0745-75-001 issued on August 26, 1975.

(n) Approval # 3-0394-74-006 issued on May 27, 1974.

4.3 The issuance of the Approval revokes and replaces approvals or portions thereof issued by the Ministry for:

(a) Approval # 3-1424-79-806 issued on January 16, 1980 for Leachate Transmission Sewers for the Burlington Landfill (closed) site.

(b) Approval # 3-1423-79-806 issued on January 17, 1980 for Leachate Collection Sewers for the Burlington Landfill (closed) site.

(c) Approval # 3-0819-86-007 issued on July 16, 1986 for Leachate Collection, Pumping and Transmission Systems for the Bayview Landfill (closed) site.

This Schedule B includes:

1.0 Definitions
2.0 Terms and Conditions
3.0 Reasons
1.0 Definitions

For the purpose of this environmental compliance approval, the following definitions apply:

“Approval” means this entire document and any schedules attached to it and the application;

“CWA” means the Clean Water Act, R.S.O. 2006, c.22, as amended;

“Director” means a person appointed by the Minister pursuant to section 5 of the EPA for the purposes of Part II.1 of the EPA;

“EPA” means the Environmental Protection Act, R.S.O. 1990, c.E.19, as amended;

“Emergency Situation” includes a structural, mechanical or electrical failure that causes a temporary reduction in the capacity of the Works and an unforeseen flow condition that may result in:
   a) danger to the health or safety of any person; or,
   b) injury or damage to any property, or serious risk of injury or damage to any property

“Equivalent Equipment” means a substituted equipment that meets the required quality and performance standards of a named equipment;

“Event” means an action or occurrence, at a given location within the Works that causes an Overflow. An Event ends when there is no recurrence of an Overflow in the 12-hour period following the last Overflow. Two Events are separated by at least 12 hours during which there has been no recurrence of an Overflow;

“Limited Operational Flexibility” means the Modifications that the Owner or the Owner at the Time of Construction is permitted to make to the Works under this Approval;

“Ministry” means the ministry of the government of Ontario responsible for the EPA, CWA and OWRA and includes all officials, employees or other persons acting on its behalf;

“Modifications” means any addition, replacement, alteration, expansion or optimization for the Works as specified under Limited Operational Flexibility;

“Notice of Modifications to Sewage Works” means the entire form entitled 'Form 1 - Notice of Modification to Sewage Works', attached to this Approval, or as amended in the Ministry's website;

“Notice of Sewage Collection System Modification” means the entire form entitled 'Form 2 - Notice of Sewage Collection System Modification' included in this Approval, or as amended in the Ministry's website;

“Owner” means Regional Municipality of Halton and its successors and assignees;

“Owner at the Time of Construction” means the company, organization, entity or individual undertaking a Modification of the sanitary sewer collection system in accordance with the terms and conditions of this Approval;

“OWRA” means the Ontario Water Resources Act, R.S.O. 1990, c. O.40, as amended;
"Overflow" means any discharge from the Works that does not undergo any treatment or only receives partial treatment before it is discharged to the environment.

"Regional Water Compliance Manager" means the Regional Water Compliance Manager of the West-Central Region of the Ministry;

"Water Supervisor" means the Water Supervisor for the Toronto, York-Durham and Halton – Peel Offices of the Ministry; and

"Works" means the sewage works described in the Owner’s application, and this Approval, and includes works under the Limited Operational Flexibility.

2.0 Terms and Conditions

You are hereby notified that this environmental compliance approval is issued to you subject to the terms and conditions outlined below:

2.1 GENERAL PROVISIONS

(1) The Owner shall ensure that any person authorized to carry out work on or operate any aspect of the Works is notified of this Approval and the conditions herein and shall take all reasonable measures to ensure any such person complies with the same.

(2) Except as otherwise provided by these Conditions, the Owner shall design, build, install, operate and maintain the Works in accordance with the description given in this Approval, the application for approval of the works and the submitted supporting documents and plans and specifications as listed in this Approval.

(3) Where there is a conflict between a provision of any submitted document referred to in this Approval and the Conditions of this Approval, the Conditions in this Approval shall take precedence, and where there is a conflict between the listed submitted documents, the document bearing the most recent date shall prevail.

(4) Where there is a conflict between the listed submitted documents, and the application, the application shall take precedence unless it is clear that the purpose of the document was to amend the application.

(5) The requirements of this Approval are severable. If any requirement of this Approval, or the application of any requirement of this Approval to any circumstance, is held invalid or unenforceable, the application of such requirement to other circumstances and the remainder of this Approval shall not be affected thereby.

(6) The approval granted by this Approval is based upon a review of the Works in the context of its effect on the environment, its process performance and general principles of wastewater engineering. The review did not include a consideration of the architectural, mechanical, electrical or structural components and minor details of the Works except to the extent necessary to review the Works.

2.2 CHANGE OF OWNER

(1) The Owner shall notify the Water Supervisor and the Director, in writing, of any of the following changes within 30 days of the change occurring:
(a) change of Owner;

(b) change of address of the Owner;

(c) change of partners where the Owner is or at any time becomes a partnership, and a copy of the most recent declaration filed under the Business Names Act, R.S.O. 1990, c.B17 shall be included in the notification to the Water Supervisor;

(d) change of name of the corporation where the Owner is or at any time becomes a corporation, and a copy of the most current information filed under the Corporations Information Act, R.S.O. 1990, c. C39 shall be included in the notification to the Water Supervisor;

(2) In the event of any change in ownership of the Works, other than a change to a successor municipality, the Owner shall notify in writing the succeeding owner of the existence of this Approval, and a copy of such notice shall be forwarded to the Water Supervisor and the Director.

2.3 OVERFLOW

(1) Any Overflow is prohibited, except:

(a) in an Emergency Situation;

(b) where the Overflow is planned for research or training purposes, the discharger notified the Water Supervisor 15 days prior to the Overflow and the Regional Water Supervisor has given written consent of the Overflow.

(2) The Owner shall forthwith notify the Spills Action Centre (SAC) and the Medical Officer of Health of all Overflow Events. This notice shall include, at a minimum, the following information:

(a) the date, time, and duration of the Event;

(b) the location of the Event;

(c) the measured or estimated volume of the Event (unless the Event is ongoing); and

(d) the reason for the Event.

(3) The Owner shall submit Overflow Event Reports to the Water Supervisor on a quarterly basis, no later than each of the following dates for each calendar year: February 14, May 15, August 14, and November 15. Event Reports shall be in an electronic format specified by the Ministry. In each Event Report the Owner shall include, at a minimum, the following information on any Events that occurred during the preceding quarter:

(a) the date, time, and duration of the Event;

(b) the location of the Event;

(c) the measured or estimated volume of the Event; and

(d) the reason for the Event.
(4) The Owner shall maintain a logbook of all Overflows, which shall contain, at a minimum, the types of information set out in subsection 2 (a) to 2(d) in respect of each Overflow.

2.4 OPERATION AND MAINTENANCE

(1) The Owner shall exercise due diligence in ensuring that, at all times, the Works and the related equipment and appurtenances used to achieve compliance with this Approval are properly operated and maintained. Proper operation and maintenance shall include effective performance, adequate funding, adequate operator staffing and training, including training in all procedures and other requirements of this Approval and the EPA, adequate laboratory facilities, process controls and alarms and the use of process chemicals and other substances used in the Works.

(2) The Owner shall update the operation manual within one (1) year of the issuance date of this Approval that includes, but not necessarily limited to, the following information:

   (a) operating procedures for routine operation of the Works;

   (b) inspection programs, including frequency of inspection, for the Works and the methods or tests employed to detect when maintenance is necessary;

   (c) repair and maintenance programs, including the frequency of repair and maintenance for the Works;

   (d) procedures for the inspection and calibration of monitoring equipment;

   (e) a spill prevention control and countermeasures plan, consisting of contingency plans and procedures for dealing with equipment breakdowns, potential spills and any other abnormal situations, including notification of the Water Supervisor; and

   (f) procedures for receiving, responding and recording public complaints, including recording any follow up actions taken.

(3) The Owner shall maintain the operations manual current and retain a copy at the location of the Works for the operational life of the Works. Upon request, the Owner shall make the manual available to Ministry staff.

2.5 REPORTING

(1) Fifteen (15) days prior to the date of a planned Overflow being conducted pursuant to Condition 2.3(1), the Owner shall notify the Water Supervisor (in writing) of the pending start date, in addition to an assessment of the potential adverse effects on the environment and the duration of the Overflow.

(2) The Owner shall, upon request, make all manuals, plans, records, data, procedures and supporting documentation available to Ministry staff.

(3) In addition to the obligations under Part X of the Environmental Protection Act, the Owner shall, within 10 working days of the occurrence of any reportable spill as defined in Ontario Regulation 675/98, bypass or loss of any product, by-product, intermediate product, oil, solvent, waste material or any other polluting substance into the environment, submit a full written report of the occurrence to the Water Supervisor describing the cause and discovery of the spill or loss, clean-up and recovery measures taken, preventative measures to be taken and schedule of implementation.
4. The Owner shall prepare, and submit to the Water Supervisor, a performance report, on an annual basis, within ninety (90) days following the end of the period being reported upon. The first such report shall cover the first annual period following the commencement of operation of the Works and subsequent reports shall be submitted to cover successive annual periods following thereafter. The reports shall contain, but shall not be limited to, the following information:

   (a) a description of any operating problems encountered and corrective actions taken;

   (b) a summary of all maintenance carried out on any major structure, equipment, apparatus, mechanism or thing forming part of the Works;

   (c) a summary of all Overflow, spill or abnormal discharge events; and

   (d) any other information the Water Supervisor requires from time to time.

5. The performance report, notifications and any other data and reports required under subsections (1), (3), (4) and (5), and Section 1.0 of Schedule C, shall be provided in a format (paper-based and/or electronic) as approved by the Water Supervisor.

6. The Owner shall retain for a minimum of five (5) years from the date of their creation, all records and information related to or resulting from the operational and monitoring activities required by this Approval.

7. The Owner shall, within 30-days of issuance of this Approval, submit a Wastewater System Profile Information document in a format as approved by the Water Supervisor, and shall resubmit the updated document every time a notification is provided to the Water Supervisor in compliance to Condition 2.2 of Schedule B.

2.6 SOURCE WATER PROTECTION

1. The Owner shall ensure for the Works located on Wellhead Protection Areas (WHPAs), Intake Protection Zones (IPZ), Highly Vulnerable Aquifers (HVA) and Significant Groundwater Recharge Areas (SGRAs), where this activity has been identified as a Significant Drinking Water Threat, there is an operation and maintenance program in place that includes, but not limited to, the following requirements:

   (a) Regular maintenance and inspection.

   (b) Best management practices to be applied.

2. To comply with Condition 2.10 (1), the Owner shall, within one (1) year after the Ministry’s approval of the Source Water Protection Plan, in adherence with the Clean Water Act regulations, submit a Source Water Protection Report to the Water Supervisor describing the following:

   (a) Summary of the requirements in the Source Water Protection Plan;

   (b) Plan showing the Works located on WHPAs, IPZ, HVA and SGRAs;

   (c) Operation and maintenance program specifying measures and best management practices to be implemented to ensure the policies mandated under the Source Water Protection Plan are complied with; and

   (d) Implementation Program to implement all measures and best management practices within a two (2) year period.

(4) The Owner shall submit the Source Water Protection Report, referenced in subsection (2) signed and stamped by a Professional Engineer or a Professional Geoscientist licensed in the Province of Ontario.

3.0 Reasons

The reasons for the imposition of these terms and conditions are as follows:

3.1 Condition 2.1 is imposed to ensure that the Works are built and operated in the manner in which they were described for review and upon which approval was granted. This condition is also included to emphasize the precedence of Conditions in the Approval and the practice that the Approval is based on the most current document, if several conflicting documents are submitted for review. The condition also advises the Owners their responsibility to notify any person they authorized to carry out work pursuant to this Approval the existence of this Approval.

3.2 Condition 2.2 is included to ensure that the Ministry records are kept accurate and current with respect to the approved works and to ensure that subsequent owners of the Works are made aware of the Approval and continue to operate the Works in compliance with it.

3.3 Condition 2.3 is included to indicate that Overflow of untreated sewage to the receiving watercourse is prohibited, save in certain limited circumstances where the failure to Overflow could result in greater injury to the public interest than the Overflow itself, where an Overflow will not violate the approved effluent requirements, or where the Overflow can be limited or otherwise mitigated by handling it in accordance with an approved contingency plan. The notification and documentation requirements allow the Ministry to take action in an informed manner and will ensure the Owner is aware of the extent and frequency of Overflow events.

3.4 Condition 2.4 is included to require that the Works be properly operated, maintained, funded, staffed and equipped such that the environment is protected and deterioration, loss, injury or damage to any person or property is prevented. As well, the inclusion of a comprehensive operations manual governing all significant areas of operation, maintenance and repair is prepared, implemented and kept up-to-date by the owner and made available to the Ministry. Such a manual is an integral part of the operation of the Works. Its compilation and use should assist the Owner in staff training, in proper plant operation and in identifying and planning for contingencies during possible abnormal conditions. The manual will also act as a benchmark for Ministry staff when reviewing the Owner’s operation of the work.

3.5 Condition 2.5 is included to provide a performance record for future references, to ensure that the Ministry is made aware of problems as they arise, and to provide a compliance record for all the terms and conditions outlined in this Approval, so that the Ministry can work with the Owner in resolving any problems in a timely manner.

3.6 Condition 2.6 is included to ensure that the works covered by this Approval will conform to the significant threat policies and designated policies in the Source Water Protection Plan.

<tr>
<th>Schedule C: Limited Operational Flexibility</th>
</tr>
</thead>
<tbody>
<tr>
<td>System Owner</td>
</tr>
<tr>
<td>ECA Number</td>
</tr>
<tr>
<td>System Name</td>
</tr>
</tbody>
</table>
This Schedule C includes:

1.0 Terms and Conditions for all Sewage Works
2.0 Criteria for Modifications to Sewage Works
3.0 Terms and Conditions for Modifications to Sanitary Sewers - By the Owner at the Time of Construction

1.0 Terms and Conditions for all Sewage Works

1.1. The Owner may make Modifications to the Works in accordance with the terms and conditions of this Approval and subject to the Ministry’s “Criteria for Modifications to Sewage Works”, included under Section 2 of Schedule C, as amended from time to time.

1.2. Sewage works under Limited Operational Flexibility shall adhere to the design guidelines contained within the Ministry publications “Design Guidelines for Sewage Works 2008”, and "Pipe Data Form" as amended.

1.3 The Owner shall ensure that, at all times, the Works and related equipment and appurtenances which are installed or used to achieve compliance are operated in accordance with all terms and conditions of this Approval.

1.4 For greater certainty, the following are not permitted as part of Limited Operational Flexibility:

   (a) Modifications to the Works that result in an increase of the Rated Capacity of the Works;

   (b) Modifications to the Works that adversely affect the approved effluent quality of the Works;

   (c) Modifications to the Works approved under s.9 of the EPA (i.e. works having an existing Air/Noise approval), and

   (d) Modifications to the Works pursuant to an order issued by the Ministry.

1.5 Implementation of Limited Operational Flexibility is not intended to be used for piecemeal measures that result in major alterations or expansions.

1.6 If the implementation of Limited Operational Flexibility requires changes to be made to the Emergency Response, Spill Reporting and Contingency Plan, the Owner shall provide a revised copy of this plan to the local fire services authority prior to implementing Limited Operational Flexibility.

1.7 For greater certainty, any alteration made under the Limited Operational Flexibility may only be carried out after other legal obligations have been complied with including those arising from the Environmental Protection Act, Niagara Escarpment Planning and Development Act, Oak Ridges Moraine Conservation Act, Lake Simcoe Protection Act and Greenbelt Act.

1.8 Prior to implementing Limited Operational Flexibility, the Owner shall complete a Notice of Modifications (Form 1 or Form 2) describing any proposed Modifications to the Works and submit it to the Water Supervisor.

1.9 The Notice of Modifications (Form 1 or Form 2) and any other information associated with it shall be provided in a format (paper-based and/or electronic) as approved by the Water Supervisor.
2.0 Criteria for Modifications to Sewage Works

Modifications to the sewage Works approved under this Approval that are permitted under the Limited Operational Flexibility, are outlined below. For clarity proposes, Modifications are not permitted for process equipment where treatment unit operations occur, including but not limited to: screens, grit separators, odour control equipment and balancing tanks.

Modifications of the sewage works that are exempt from section 53 of the OWRA by O. Reg. 525/98 continue to be exempt and are not required to follow the notification process under this Limited Operational Flexibility. If there is a conflict between the criteria listed below and the conditions in this Approval Section 1 of Schedule C, then the conditions in the Approval Section 1 of Schedule C, shall take precedence.

Modifications to the Works permitted under Limited Operational Flexibility, and as per the conditions in the Approval are limited as follows:

2.1 Sewage Pumping Stations.

(a) Alter pumping capacity by adding or replacing equipment where new equipment is located within an existing wastewater pumping station, provided that the Modifications do not result in an increase of capacity of the sewage treatment plant downstream. (b) Replacing existing minor equipment with equivalent equipment of different make and model, provided that there are no treatment process changes as a result of the replacement.

2.2 Sanitary Sewer mains.

(a) Pipe relining and replacement with similar pipe size and slope to the site’s existing sanitary sewer mains and forcemains sewage collection system. The sewer main addition, modification, replacement and extensions do not include combined sewers.

(b) Sanitary sewer mains and forcemains, except those with a nominal diameter greater than 1,200 mm.

3.0 Terms and Conditions for Modification to the Sanitary Sewers - By the Owner at the Time of Construction

3.1 The Owner shall ensure that the Owner at the Time of Construction planning any Modification to the sanitary sewage collection system is notified of this Approval and the conditions herein and shall take all reasonable measures to ensure any such person complies with the same.

3.2 The Owner at the Time of Construction may design and construct a Modification of sanitary sewage collection system subject to subsections 3.3 through 3.7 below.

3.3 The Owner at the Time of Construction must verify that the design of the Modification to the sanitary sewers:
(a) Has been prepared by a Professional Engineer who is licensed to practice in the Province of Ontario;
(b) Has been designed only to transmit sanitary sewage and will not operate as a combined sewer;
(c) Has the consent of the land (site) owner for the installation/construction and the operation of the sanitary sewer(s);
(d) Satisfies the applicable requirements under the Municipal Class Environmental Assessment and the Environmental Assessment Act;
(e) Has not received a request for a Part II Order under the Environmental Assessment Act; and
(f) Satisfies the design criteria set out in the Ministry publication "Design Guidelines for Sewage Works 2008".

3.4 The Owner must verify that:

(a) The maximum capacity provided by the sanitary sewer(s) addition, modification, replacement or extension as described by the Owner at the Time of Construction above will not result in an exceedance of the rated capacity of the receiving municipal wastewater treatment system; and
(b) They consent to the sanitary sewer(s) addition, modification, replacement or extension.

3.5 For greater certainty, any Modification to the sanitary sewers made in accordance with this Approval may only be carried out after other legal obligations have been complied with including those arising from the Environmental Assessment Act, Niagara Escarpment Planning and Development Act, Oak Ridges Moraine Conservation Act, 2001 and Greenbelt Act, 2005.

3.6 Prior to implementing any Modification to the sanitary sewers, the Owner at the Time of Construction and the Owner shall complete Form 2 - Notice of Sewage Collection System Modification describing any proposed Modification, and submit it to the Director.

3.7 The Owner at the Time of Construction shall not proceed with the Modification of the sanitary sewer collection system until an authorizing written response is received from the Director.

This Schedule D includes:
1.0 Supporting Documents

2.0 Director's Approval

1.0 Supporting Documents

2. ECA No. 6043-8W9Q6U issued on August 2, 2012, and supporting information.

2.0 Director's Approval

In accordance with Section 139 of the Environmental Protection Act, you may by written Notice served upon me and the Environmental Review Tribunal within 15 days after receipt of this Notice, require a hearing by the Tribunal. Section 142 of the Environmental Protection Act provides that the Notice requiring the hearing shall state:

1. The portions of the environmental compliance approval or each term or condition in the environmental compliance approval in respect of which the hearing is required, and;

2. The grounds on which you intend to rely at the hearing in relation to each portion appealed.

Pursuant to subsection 139(3) of the Environmental Protection Act, a hearing may not be required with respect to any terms and conditions in this environmental compliance approval, if the terms and conditions are substantially the same as those contained in an approval that is amended or revoked by this environmental compliance approval.

The Notice should also include:

3. The name of the appellant;

4. The address of the appellant;
5. The environmental compliance approval number;
6. The date of the environmental compliance approval;
7. The name of the Director, and;
8. The municipality or municipalities within which the project is to be engaged in.

And the Notice should be signed and dated by the appellant.

This Notice must be served upon:

The Secretary*
Environmental Review Tribunal
655 Bay Street, Suite 1500
Toronto, Ontario
M5G 1E5

AND

The Director appointed for the purposes of Part II.1 of the Environmental Protection Act
Ministry of the Environment
2 St. Clair Avenue West, Floor 12A
Toronto, Ontario
M4V 1L5

* Further information on the Environmental Review Tribunal’s requirements for an appeal can be obtained directly from the Tribunal at: Tel: (416) 212-6349, Fax: (416) 314-4506 or www.ert.gov.on.ca

The above noted activity is approved under s.20.3 of Part II.1 of the Environmental Protection Act.

DATED AT TORONTO this 22nd day of November, 2013

Edgardo Tovilla
Director
appointed for the purposes of Part II.1 of the Environmental Protection Act
