AMENDED ENVIRONMENTAL COMPLIANCE APPROVAL

NUMBER 9756-AK7KQT
Issue Date: March 10, 2017

Friday Harbour Resort Inc.
3190 Steeles Avenue East, No. 300
Markham, Ontario
L3R 1G9

Site Location: 261 Big Bay Point Road
Town of Innisfil, County of Simcoe, Ontario

You have applied under section 20.2 of Part II.1 of the Environmental Protection Act, R.S.O. 1990, c. E. 19 (Environmental Protection Act) for approval of:

amendment to the wastewater infrastructure Works to include proposed construction of two (2) stormwater pumping stations (SWPS) and associated forcemains to service proposed Friday Harbour Resort Development ("FHRD") project, in the Town of Innisfil, County of Simcoe, as follows:

Proposed Works:

1. North Stormwater Pumping Station:

a stormwater pumping station, having a peak design capacity of 343 litres per second, located on the north side of the Phase 1 marina basin at 261 Big Bay Point Road ("Site"), to be constructed to service FHRD, in the Town of Innisfil, as part of the storm conveyance system to collect drainage from run-off from all boardwalk (excluding the pier and promenade), some landscaped areas adjacent to the marina basin, and stormwater from the West SWPS, consisting of 5 metre diameter circular cast-in-place concrete wet well with the following features:

- single cell configuration with concrete platform for mezzanine level valve and equipment installation;
- ultrasonic level transmitter with float backup;
- surge anticipation/release valve and discharge line with isolation gate valve;
- combination air/vacuum release valve, check valve, and isolation gate valve;
- equipment and operator access hatches;
- intermediate aluminium landing platform and gratings;
- vent pipe to allow natural draft ventilation;
- one (1) submersible wastewater pump having a rated capacity of 396 litres per second, capable of handling a peak flow of 343 litres per second against a total dynamic head of 41.22 metres;
- 400 mm diameter internal station piping with necessary appurtenances;
- 300 mm diameter intake with isolation knife gate valve with electrical actuator;

- 1050 mm diameter storm sewer inlet concrete trough;
- 3.5 metre wide and 0.4 metre deep overflow channel; and
- 500 mm diameter forcemain to Maintenance Hole no. 6 on Friday Drive.

2. West Stormwater Pumping Station:

a stormwater pumping station, having a peak design capacity of 76 litres per second, located on the south-west corner of the FHRD, to be constructed to service the FHRD as part of the storm conveyance system in the Town of Innisfil, will collect drainage from the south-west drainage area, consisting of 4.0 metre diameter circular cast-in-place concrete wet well with the following features:

- single cell configuration;
- ultrasonic level transmitter with float backup;
- combination air/vacuum release valve, check valve, and isolation gate valve;
- equipment and operator access hatches;
- aluminium landing platform and gratings;
- vent pipe to allow natural draft ventilation;
- one (1) submersible wastewater pump having a rated capacity of 80 litres per second, capable of handling a peak flow of 76 litres per second against a total dynamic head of 7.19 metres;
- 200 mm diameter internal station piping with necessary appurtenances;
- 50 mm diameter drain line with isolation gate valve and appurtenances;
- 600 mm diameter storm sewer inlet elbow;
- 450 mm diameter inlet/outlet elbow hydraulically connecting to external storage tank; and
- 300 mm diameter forcemain to the Maintenance Hole no. CBMH 41B.

Previous Works:

establishment of stormwater management Works to service a catchment area of approximately 84.71 hectares residential and commercial development (i.e. Marina Resort (approximately 40.2 hectares), and Golf Course (approximately 44.51 hectares)), located at 3800 Friday Drive, within the Lake Simcoe watershed, in the Town of Innisfil, in the County of Simcoe, related to the construction of SWM Pond, for the collection, treatment and disposal of stormwater run-off from the development, discharging to the Environmental Protection Area on the east side of Friday Drive and then to Lake Simcoe, providing Enhanced Level water quality control and erosion protection and attenuating post development peak flows to pre-development peak flows up to and including 100-year storm event, consisting of the following:

stormwater management facility (catchment area 84.71 ha): - one (1) wet pond with a sediment forebay, located on the east side of Big Bay Point Road, north side of 13th Line, having a required permanent pool volume of 10,165 m³, an extended detention volume of 9,072 m³, and a total storage volume of approximately 19,117 m³, including the permanent pool volume, at a total depth of 4.50 m, receiving inflows from the 25 mm storm event of marina resort located on the north-east of the property south of Big Bay Point Road via a storm forcemain, identified below, from the run-off of the north-west and west side of the golf course including the civic use block via a 1200 mm diameter storm

sewer, and overland flow discharging through two (2) 450 mm perforated pipe equipped with orifice controls, connecting to a 2400 mm x 1800 mm precast concrete outlet control manhole consisting of an overflow weir, and then via a 1200 mm diameter outfall pipe discharging to a 2400 mm diameter precast control manhole and to a plunge pool, identified below;

storm forcemain: to be constructed on Friday Drive, from the north SWM pumping station, located on the north-east of the property, north side of marina basin on the marina village, to the stormwater management facility, identified above;

plunge pool: - one (1) plunge pool on the south of Friday Drive, having a total volume of 34 m³ at a depth of approximately 1.0 m, with a 2 metres bottom width and 3:1 and 1.5:1 side slopes, consisting of a 0.45 m deep layer of 100-300 mm diameter rip-rap overlaying filter cloth (Terrafix 270R or Equivalent), discharging to the Environmental Protection Area to the east, on the south side of the site and south side of Friday Drive, and then ultimately to Lake Simcoe;

including erosion/sedimentation control measures during construction and all other controls and appurtenances essential for the proper operation of the aforementioned Works;

all in accordance with the submitted application and following supporting documents, listed in Schedule "B", forming part of this Approval.

For the purpose of this environmental compliance approval, the following definitions apply:

"Approval" means this entire document including the application and any supporting documents listed in any schedules in this Approval;

"Director" means a person appointed by the Minister pursuant to section 5 of the Environmental Protection Act for the purposes of Part II.1 of the Environmental Protection Act;

"EPA" means the Environmental Protection Act, R.S.O. 1990, c.E.19, as amended;

"Equivalent" means a substituted product that meets the required quality and performance standards of a named product;

"Limited Operational Flexibility" (LOF) means the modifications that the Owner is permitted to make to the Works under this Approval;

"Ministry" means the ministry of the government of Ontario responsible for the Environmental Protection Act and the Ontario Water Resources Act and includes all officials, employees or other persons acting on its behalf;

"Notice of Modifications" means the form entitled "Notice of Modifications to Sewage Works" included in Schedule "A";

"Owner" means the Friday Harbour Resort Inc. and includes their successors and assignees;

"Previous Works" means those portions of the sewage Works previously approved under an Approval;

"Professional Engineer" means a person entitled to practise as a Professional Engineer in the Province of Ontario under a licence issued under the Professional Engineers Act;

"Proposed Works" means the sewage works described in the Owner's application, this Approval, to the extent approved by this Approval;

"Substantial Completion" has the same meaning as "substantial performance" in the Construction Lien Act;

"Works" means the sewage works described in the Owner's application, and this Approval, and

includes Proposed Works, Previous Works, and modifications made under Limited Operational Flexibility.

You are hereby notified that this environmental compliance approval is issued to you subject to the terms and conditions outlined below:

TERMS AND CONDITIONS

1. GENERAL PROVISIONS

(1) The Owner shall ensure that any person authorized to carry out work on or operate any aspect of the Works is notified of this Approval and the Conditions herein and shall take all reasonable measures to ensure any such person complies with the same.

(2) Except as otherwise provided by these Conditions, the Owner shall design, build, install, operate and maintain the Works in accordance with the description given in this Approval, and the application for Approval of the Works.

(3) Where there is a conflict between a provision of any submitted document referred to in this Approval and the Conditions of this Approval, the Conditions in this Approval shall take precedence, and where there is a conflict between the listed submitted documents, the document bearing the most recent date shall prevail.

(4) Where there is a conflict between the listed submitted documents, and the application, the application shall take precedence unless it is clear that the purpose of the document was to amend the application.

(5) The Conditions of this Approval are severable. If any Condition of this Approval, or the application of any requirement of this Approval to any circumstance, is held invalid or unenforceable, the application of such Condition to other circumstances and the remainder of this Approval shall not be affected thereby.

(6) The issuance of, and compliance with the Conditions of this Approval does not:

(a) relieve any person of any obligation to comply with any provision of any applicable statute, regulation or other legal requirement, including, but not limited to, the obligation to obtain approval from the local conservation authority necessary to construct or operate the sewage Works; or

(b) limit in any way the authority of the Ministry to require certain steps be taken to require the Owner to furnish any further information related to compliance with this Approval.

(7) This approval includes the treatment and disposal of stormwater run-off from 84.71 hectare draining to the wet pond on Block 78, assuming an average imperviousness of 43%. Any changes within the drainage area that might increase the required storage volumes or increase the flows to or from the wet pond or any structural/physical changes to the wet pond including the inlets or outlets will require an amendment to this approval.

2. EXPIRY OF APPROVAL

This Approval will cease to apply to those parts of the proposed Works which have not been constructed within **five (5) years** of the date of this Approval.

3. CHANGE OF OWNER

(1) The Owner shall notify the Director, in writing, of any of the following changes within **thirty (30) days** of the change occurring:

(a) change of Owner;

(b) change of address of the Owner;

(c) change of partners where the Owner is or at any time becomes a partnership, and a copy of the most recent declaration filed under the Business Names Act, R.S.O. 1990, c. B17 shall be included in the notification to the Director;

(d) change of name of the corporation where the Owner is or at any time becomes a corporation, and a copy of the most current information filed under the Corporations Information Act, R.S.O. 1990, c. C39 shall be included in the notification to the Director.

4. UPON SUBSTANTIAL COMPLETION OF THE SEWAGE PUMPING STATION

(1) Upon Substantial Completion of the sewage pumping station, the Owner shall prepare a statement, certified by a Professional Engineer, that the sewage pumping station was constructed in accordance with this Approval, and shall make the written statement available to the Ministry, upon request.

(2) Within **one (1) year** of Substantial Completion of the sewage pumping station, a set of as-built drawings showing the sewage pumping station “as constructed” shall be prepared. These drawings shall be kept up to date through revisions undertaken from time to time and a copy shall be retained at the sewage pumping station for the operational life of the sewage pumping station.

5. OPERATION AND MAINTENANCE

A) For Stormwater Management Works:

(1) The Owner shall inspect the Works at least **once a year** and, if necessary, clean and maintain the Works to prevent excessive build-up of sediments and/or vegetation.

(2) The Owner shall maintain a record the results of these inspections and shall identify any cleaning and maintenance operations undertaken. The record shall include the following:

(a) the name of the Works; and

(b) the date and results of each inspection, maintenance and cleaning, including an estimate of the quantity of any materials removed.

B) For Stormwater Pumping Station:

(1) The Owner shall exercise due diligence in ensuring that, at all times, the Works and the related equipment and appurtenances used to achieve compliance with this Approval are properly operated and maintained. Proper operation and maintenance shall include effective performance, adequate funding, adequate operator staffing and training, including training in all procedures and other requirements of this Approval and the Act and regulations, adequate laboratory facilities, process controls and alarms and the use of process chemicals and other substances used in the Works.

(2) The Owner shall prepare an operations manual within **six (6) months** of Substantial Completion of the sewage pumping station, that includes, but not necessarily limited to, the following information:

(a) operating procedures for routine operation of the sewage pumping station;

(b) inspection programs, including frequency of inspection, for the sewage pumping station and the methods or tests employed to detect when maintenance is necessary;

(c) repair and maintenance programs, including the frequency of repair and maintenance for the sewage pumping station;

(d) procedures for the inspection and calibration of monitoring equipment;

(e) a spill prevention control and countermeasures plan, consisting of contingency plans and procedures for dealing with equipment breakdowns, potential spills and any other abnormal situations, including notification of the Water Supervisor; and

(f) procedures for receiving, responding and recording public complaints, including recording any follow-up actions taken.

(3) The Owner shall maintain the operations manual current and retain a copy at the location of the sewage pumping station for the operational life of the sewage pumping station. The Owner shall make the manual available to the Ministry, upon request.

(4) The Owner shall make all manuals, plans, records, data, procedures and supporting documentation available to the Ministry, upon request.

6. MONITORING AND REPORTING

The Owner shall, upon commencement of operation of the Works, carry out the following monitoring program:

(1) All samples and measurements taken for the purposes of the this Approval are to be taken at a time and in a location characteristic of the quality and quantity of the effluent stream over the time period being monitored.

(2) Samples shall be collected at the following sampling points, at the frequency specified, by means of the specified sample type and analysed for each parameter listed and all results recorded:

Table 1 - Influent / Effluent Monitoring	
Sample Points: Influent: HW1 and HW2 Effluent: MH101	
Frequency	Quarterly (once every three months) Note: Effluent sampling shall be conducted within 72 hours after a rainfall event causing discharge from the Works or after a spring freshet event.
Sample Type	Grab
Parameters	Influent: Total Suspended Solids, pH, Temperature, Dissolved Oxygen, Total Phosphorus and Oil & Grease Effluent: Total Suspended Solids, Total Phosphorus, pH, Temperature, Dissolved Oxygen, and Oil & Grease

(3) The methods and protocols for sampling, analysis and recording shall confirm, in order of precedence, to the methods and protocols specified in the following:

(a) the Ministry's Procedure F-10-1, "Procedures for Sampling and Analysis Requirements for Municipal and Private Sewage Treatment Works (Liquid Waste Streams Only)", as amended from time to time by more recently published editions;

(b) the Ministry's publication "Protocol for the Sampling and Analysis of Industrial/Municipal Wastewater" (January 1999), ISBN 0-7778-1880-9, as amended from time to time by more recently published editions;

(c) the publication "Standard Methods for the Examination of Water and Wastewater" (21st edition), as amended from time to time by more recently published editions;

(4) The Owner shall use data from sampling and monitoring to quantify phosphorus

removals/reductions associated with the proposed Works.

(5) The measurement frequencies and parameters specified in Table 1 and subsection (4) in respect to any parameter are minimum requirements which may, after three (3) years of monitoring in accordance with this Condition, be modified by the District Manager in writing from time to time.

(6) The Owner shall make all manuals, plans, records, data, procedures and supporting documentation available for review by the Ministry upon request.

(7) The Owner shall prepare and submit to the District Manager of Barrie Office a performance report, on an annual basis, by March 31st. The first such report shall cover the first calendar year commencing after the issuance of this Approval and subsequent reports shall be submitted to cover successive calendar years. The reports shall contain, but shall not be limited to, the following information:

(a) a summary and interpretation of all monitoring data and a comparison to the Provincial Water Quality Objectives (PWQO), including an overview of the success and adequacy of the performance of the Works;

(b) a description of any operating problems encountered and corrective actions taken;

(c) a summary of all maintenance carried out on my major structure, equipment, apparatus, mechanism or thing forming part of the Works;

(d) a summary of any effluent quality assurance or control measures undertaken in the reporting period;

(e) any other information that the District Manager may require from time to time.

7. LIMITED OPERATIONAL FLEXIBILITY

(1) The Owner may make modifications to the Works in accordance with the Terms and Conditions of this Approval and subject to the Ministry's "Limited Operational Flexibility Criteria for Modifications to Sewage Works", included under Schedule "A" of this Approval, as amended.

(2) The sewage pumping station works proposed under Limited Operational Flexibility shall adhere to the design guidelines contained within the Ministry's publication "Design Guidelines for Sewage Works 2008", as amended.

(3) The Owner shall ensure at all times, that the sewage pumping station works, related equipment and appurtenances which are installed or used to achieve compliance are operated in accordance with all Terms and Conditions of this Approval.

(4) For greater certainty, the following are not permitted as part of Limited Operational Flexibility:

(a) Modifications to the sewage pumping station works that result in an increase of the Rated Capacity of the sewage pumping station works;

(b) Modifications to the sewage pumping station works that may adversely affect the approved effluent quality criteria or the location of the discharge/outfall;

(c) Modifications to the sewage pumping station works approved under s.9 of the EPA, and

(d) Modifications to the sewage pumping station works pursuant to an order issued by the Ministry.

(5) Implementation of Limited Operational Flexibility is not intended to be used for piecemeal

measures that result in major alterations or expansions.

(6) If the implementation of Limited Operational Flexibility requires changes to be made to the Emergency Response, Spill Reporting and Contingency Plan, the Owner shall, as deemed necessary in consultation with the Water Supervisor, provide a revised copy of this plan for approval to the local fire services authority prior to implementing Limited Operational Flexibility.

(7) For greater certainty, any alteration made under the Limited Operational Flexibility may only be carried out after other legal obligations have been complied with including those arising from the Environmental Protection Act, Niagara Escarpment Planning and Development Act, Oak Ridges Moraine Conservation Act, Lake Simcoe Protection Act and Greenbelt Act.

(8) Prior to implementing Limited Operational Flexibility, the Owner shall complete a Notice of Modifications describing any proposed modifications to the sewage pumping station works and submit it to the Water Supervisor.

8. TEMPORARY EROSION AND SEDIMENT CONTROL

(1) The Owner shall install and maintain temporary sediment and erosion control measures during construction and conduct inspections once every **two (2) weeks** and after each significant storm event (a significant storm event is defined as a minimum of 25 mm of rain in any 24 hours period). The inspections and maintenance of the temporary sediment and erosion control measures shall continue until they are no longer required and at which time they shall be removed and all disturbed areas reinstated properly.

(2) The Owner shall maintain records of inspections and maintenance which shall be made available for inspection by the Ministry, upon request. The record shall include the name of the inspector, date of inspection, and the remedial measures, if any, undertaken to maintain the temporary sediment and erosion control measures.

9. RECORD KEEPING

The Owner shall retain for a minimum of **five (5) years** from the date of their creation, all records and information related to or resulting from the operation and maintenance activities required by this Approval.

Schedule "A"

Limited Operational Flexibility Criteria for Modifications to Sewage Works

1. The modifications to a sewage pumping station approved under an Environmental Compliance Approval (Approval) that are permitted under the Limited Operational Flexibility (LOF), are outlined below and are subject to the LOF conditions in the Approval, and require the submission of the Notice of Modifications. If there is a conflict between the sewage pumping station works listed below and the Terms and Conditions in the Approval, the Terms and Conditions in the Approval shall take precedence.

1.1 Sewage Pumping Stations

a. Adding or replacing equipment where new equipment is located within an existing sewage pumping station site, provided that the facility Rated Capacity is not exceeded and the existing flow process and/or treatment train are maintained, as applicable.

1.2 Pilot Systems

a. Installation of pilot systems for new or existing technologies provided that:

- i. any effluent from the pilot system is discharged to the inlet of the sewage pumping station or hauled off-site for proper disposal,
- ii. any effluent from the pilot system discharged to the inlet of the sewage pumping station or sewage conveyance system does not significantly alter the composition/concentration of the influent sewage to be treated in the downstream process; and that it does not add any inhibiting substances to the downstream process, and
- iii. the pilot system's duration does not exceed a maximum of two years; and a report with results is submitted to the Director and Water Supervisor three months after completion of the pilot project.

2. Sewage works that are exempt from section 53 of the OWRA by O. Reg. 525/98 continue to be exempt and are not required to follow the notification process under this Limited Operational Flexibility.

3. Normal or emergency operational modifications, such as repairs, reconstructions, or other improvements that are part of maintenance activities, including cleaning, renovations to existing approved sewage works equipment, provided that the modification is made with Equivalent Equipment, are considered pre-approved.

4. The modifications noted in section (3) above are not required to follow the notification protocols under Limited Operational Flexibility, provided that the number of pieces and description of the equipment as described in the Approval does not change.

Schedule "B"

1. Environmental Compliance Approval Application , dated November 7, 2016, signed by Scott MacKenzie, P.Eng., Development Engineer, The Corporation of the Town of Innisfil on February 10, 2017;
2. Friday Harbour Resort Development North Stormwater Pumping Station Design Report, dated October 2016, prepared by The Municipal Infrastructure Group Ltd. (TMIG);
3. Friday Harbour Resort Development West Stormwater Pumping Station Design Report, dated October 2016, prepared by The Municipal Infrastructure Group Ltd. (TMIG);
4. Set of Engineering Drawings for Friday Harbour Resort Development Stormwater Pumping Stations, dated November 2016, prepared by The Municipal Infrastructure Group Ltd. (TMIG).
5. Application for Environmental Compliance Approval, dated February 22, 2016, received on March 9, 2016, submitted by SCS Consulting Group Ltd;
6. Stormwater Management Report for SWM Pond Friday Harbor Resort, Town of Innisfil, dated December, 2015, prepared by SCS Consulting Group Ltd;
7. Set of Engineering Drawings (7 drawings) for Golf Course, 3800 Friday Drive, dated December, 2015, prepared by SCS Consulting Group Ltd;
8. E-mail from John Priamo of SCS Consulting Group Ltd to the Ministry, dated July 14, 2016;
9. E-mail from John Priamo of SCS Consulting Group Ltd to the Ministry, dated July 21, 2016;
10. E-mail from John Priamo of SCS Consulting Group Ltd to the Ministry, dated September 6, 2016;

11. E-mail from John Priamo of SCS Consulting Group Ltd to the Ministry, dated September 21, 2016;
12. E-mail from John Priamo of SCS Consulting Group Ltd to the Ministry, dated September 22, 2016;
13. E-mail from John Priamo of SCS Consulting Group Ltd to the Ministry, dated September 30, 2016;
14. E-mail from John Priamo of SCS Consulting Group Ltd to the Ministry, dated October 3, 2016;
15. E-mail from John Priamo of SCS Consulting Group Ltd to the Ministry, dated October 11, 2016;
16. E-mail from John Priamo of SCS Consulting Group Ltd to the Ministry, dated November 4, 2016;
- and
17. E-mail from John Priamo of SCS Consulting Group Ltd to the Ministry, dated November 8, 2016.

The reasons for the imposition of these terms and conditions are as follows:

1. Condition 1 is imposed to ensure that the Works are built and operated in the manner in which they were described for review and upon which approval was granted. This Condition is also included to emphasize the precedence of Conditions in the Approval and the practice that the Approval is based on the most current document, if several conflicting documents are submitted for review.
2. Condition 2 is included to ensure that, when the Works are constructed, the Works will meet the standards that apply at the time of construction to ensure the ongoing protection of the environment.
3. Condition 3 is included to ensure that the Ministry records are kept accurate and current with respect to approved Works and to ensure that any subsequent Owner of the Works is made aware of the Approval and continue to operate the Works in compliance with it.
4. Condition 4 is included to ensure that the sewage pumping station is constructed in accordance with the Approval and that record drawings of the sewage pumping station “as constructed” are maintained for future reference.
5. Condition 5 is included to require that the Works be properly operated, maintained, funded, staffed and equipped such that the environment is protected and deterioration, loss, injury or damage to any person or property is prevented. As well, the inclusion of a comprehensive operations manual for the sewage pumping station governing all significant areas of operation, maintenance and repair is prepared, implemented and kept up-to-date by the Owner and made available to the Ministry. Such a manual is an integral part of the operation of the sewage pumping station. Its compilation and use should assist the Owner in staff training, in proper plant operation and in identifying and planning for contingencies during possible abnormal conditions. The manual will also act as a benchmark for Ministry staff when reviewing the Owner's operation of the Works.
6. Condition 6 is included to enable the Owner to evaluate and demonstrate the performance of the Works, on a continual basis, so that the Works are properly operated and maintained at a level which is consistent with the design objectives specified in the Approval and that the Works do not cause any impairment to the receiving watercourse. This Condition is also included to provide a performance record for future reference, to ensure that the Ministry is made aware of problems as they arise, and to provide a compliance record for all the terms and conditions outlined in this Approval, so that the Ministry can work with the Owner in resolving any problems in a timely manner.
7. Condition 7 is included to ensure that the Works are operated in accordance with the application and supporting documentation submitted by the Owner, and not in a manner which the Director has not been asked to consider. These Conditions are also included to ensure that a Professional Engineer has reviewed the proposed Modifications and attests that the Modifications are in line with that of Limited Operational Flexibility, and provide assurance that the proposed Modifications comply with the Ministry's requirements stipulated in the Terms and Conditions of this Approval, Ministry

policies, guidelines, and industry engineering standards and best management practices.

8. Condition 8 is included as installation, regular inspection and maintenance of the temporary sediment and erosion control measures is required to mitigate the impact on the downstream receiving watercourse during construction, until they are no longer required.

9. Condition 9 is included to require that all records are retained for a sufficient time period to adequately evaluate the long-term operation and maintenance of the Works.

Upon issuance of the environmental compliance approval, I hereby revoke Approval No(s). 5774-ABTNVH issued on November 9, 2016

In accordance with Section 139 of the Environmental Protection Act, you may by written Notice served upon me and the Environmental Review Tribunal within 15 days after receipt of this Notice, require a hearing by the Tribunal. Section 142 of the Environmental Protection Act provides that the Notice requiring the hearing shall state:

1. The portions of the environmental compliance approval or each term or condition in the environmental compliance approval in respect of which the hearing is required, and;
2. The grounds on which you intend to rely at the hearing in relation to each portion appealed.

Pursuant to subsection 139(3) of the Environmental Protection Act, a hearing may not be required with respect to any terms and conditions in this environmental compliance approval, if the terms and conditions are substantially the same as those contained in an approval that is amended or revoked by this environmental compliance approval.

The Notice should also include:

3. The name of the appellant;
4. The address of the appellant;
5. The environmental compliance approval number;
6. The date of the environmental compliance approval;
7. The name of the Director, and;
8. The municipality or municipalities within which the project is to be engaged in.

And the Notice should be signed and dated by the appellant.

This Notice must be served upon:

The Secretary*
Environmental Review Tribunal
655 Bay Street, Suite 1500
